

ENVIROMENTAL POLICY

Safex Supplies Limited is committed to the protection and enhancement of the environment. Improving our overall environmental performance is a major and continuing priority for us.

We endeavour to minimise the environmental impact of our activities, products and processes in our ongoing environmental reviews.

We are committed to continuous improvement and the prevention of pollution in all that we do using best available techniques where appropriate.

We are committed to eliminating or reducing any adverse impact by:

1. Wherever practicable using suppliers that adhere to an environmental management system thereby giving preference to those companies and products that cause the least harm to the environment.
2. Ensuring our business practices produce the minimum of waste and reduce environmental impact by utilising email, recycling and the use of energy efficient measures in our offices wherever practicable (Safex currently re-use 99% of all outer cartons).
3. Induct and educate all employees (both new and current) on environmental issues.
4. Work together to eliminate excess packing materials and where possible reduce the amount of packaging used.
5. Where possible minimise the impact of our transport for delivery.
6. Regularly review all areas of improving environmental aspects within our business.
7. Make our environmental policy available to customers, suppliers and the public.
